20.12.19

## FIRST CLASS LEARNING

*Here at Meadowcroft, we're dedicated to ensuring our pupils excel at everything and anything they can. With that in mind, Mrs Richardson has recently made it her mission to boost the confidence of our learners by showing them just how capable they are! How you might ask? Using 'The First Class Diagnostic test'; a means of establishing a pupil's academic baseline, as well as helping us at the school consider what **personalised** learning should come next. However, we at Meadowcroft wanted to highlight the astonishing **success** of two pupils at the 'Works' that have recently completed the assessment.*

*Both Jason and Callum have performed "outstandingly well" Mrs Richardson announced, subsequently **enrolling** the pair onto the 'First Class Learning Maths Program' on a scholarship award, which believe it or not is a **UK Nationwide course!** GET IN LADS!*

*I think I speak for everyone here at Meadowcroft when I say that we all **eagerly** await what the 'First Class Learning Program' can do for our pupils in the **near future!***

## A BBC OUTING!

YEP. YOU READ  
RIGHT!

*On the 29<sup>th</sup> November Meadowcroft's **catering students** from both the 'Hub' and the 'Works' went on a trip to The BBC 'Good Food Show' in Birmingham! Once there, pupils were able to explore different stalls and sample a variety of foods from across the **globe** (I know right, swanky). Students had a **phenomenal** time tasting in particular, as well as buying some unusual condiments to take home with them whilst keeping an eye out for any **celebrity chefs** they might've spotted (**Gordon Ramsey**, where you at?). A late finish back at the Works marked the end of a **riveting** but tiring trip!*

*Mrs Clayton was more than proud to show off some of our school's most **gifted** culinary students!*
